One Square Yard of Creation

Look at one square yard of land near your home, your school, or in a park. How many different things can you find there that the Lord created? You may want to check the area at different times of day. If you have a magnifying lens, use it to see little creatures you may have missed without it.

Make a list of what you find. Are these things part of the mineral, plant, or animal kingdom? Have each member of the family (or class) examine different areas, then compare what was found. Or work in pairs and share the fun of "unearthing" new treasures!

What You Found	Animal Kingdom	Plant Kingdom	Mineral Kingdom

Did you find more or less than you expected? What was your most interesting "find"?
